

INTERNSHIPS

Research Technician

University of Hawaiʻi Sea Grant

College: Nalley Lab

May 2025 — September 2025

- Developed and conducted the protocol for the molecular analysis of benthic dinoflagellates to identify ciguatera causing species.
- Conducted microscope identification of ciguatera causing identification dinoflagellates.
- Participated in field sampling of macro-algal and environmental DNA samples.

Marine Biology Internship

Donovan Labs & HIMARC:

<https://donovanlab.org/>

May 2022 – June 2023

- Assisted with research focused on investigating the growth and mortality of corals across the Main Hawaiian Islands following the 2019 bleaching event.
- Utilized imagery collected at fixed monitoring sites using SfM technology from 2019 to 2021 that involved working with software such as ArcGIS and Agisoft Metashape to track individual coral colonies over time.
- Assisted with CoralNet taxonomic identification of benthic cover analysis for fixed monitoring sites.

EDUCATION

BS, Marine Biology

Hawaiʻi Pacific University

May 2025

- GPA: 3.5 (Cum Laude)
- Capstone: Spatiotemporal Variation and Environmental Drivers of *Gambierdiscus* spp. dinoflagellates around Oʻahu, Hawaiʻi

High School Diploma

Wilson Hill Academy

May 2020

- GPA: 3.9 (Summa cum laude)
- Senior thesis: Assisted Evolution: A Method of Coral Restoration

RESEARCH EXPERIENCE

Undergraduate Student Researcher

Hawaiʻi Pacific University: Iacchei Lab

— Honolulu, Hawaiʻi

Jan 2025 — May 2025

- Assisted with cell identification and quantification for ciguatera research on dinoflagellates in the genera *Gambierdiscus*.
- Assessed the influence of environmental drivers on *Gambierdiscus* spp. abundance and spatial distribution.
- Investigated and modeled the spatial and temporal variation in the density and distribution of *Gambierdiscus* spp. dinoflagellates around Oʻahu

WORK EXPERIENCE

Swim Coach/Swim Instructor

The Woodlands Township — The Woodlands, Texas

March 2019 — July 2024

- Taught swimming and water safety to children (as young as six months) and adults. Focused on learning to swim, in-water safety and drowning prevention, improving swimming ability, and enhancing stroke execution in both private and group settings.
- Scheduled and coordinated private and group lessons, planned lessons and activities, communicated with parents regarding schedule, aided in the children's instruction, and taught students in the water.
- Presented at events about water safety and correct swimming techniques.
- Coached swim team in practices and at competitive meets.
- Managed practices, registrations, and communications with swimmers and parents
- Taught proper stroke execution, racing dives, and turns to children ranging from 5 to 18 years of age

TECHNICAL & LABORATORY COMPETENCIES

- Level 3 Biosecurity and Biosafety Certificate
- Multi-Core, Box Core, and VanVeen Grab sediment sampling using hydraulic winch.
- Neuston & Plankton Tows
- Hydrocast with Niskin Bottles
- Intertidal Surveys with transects, quadrats, and timed intervals.
- Microscopy
- DNA Extractions
- DNA Purification
- PCR
- Gel Electrophoresis
- Modeling Species Distribution and Habitat Utilization
- Inferential Statistics
- Red Cross: Water Safety Instructor
- Red Cross: Swim Instructor
- Scuba: SSI Open Water Diver
- Scuba: SSI Enriched Air Nitrox
- Microsoft PowerPoint
- Microsoft Word
- ArcGIS Pro 3
- GIS Map Viewer
- Rstudio
- Bayesian Environmental and Ecological Modeling
- Spatial Analysis and Modeling
- Hot Spot Analysis
- Spatial Interpolation [Kriging/IWD/Bayesian]

TEACHING EXPERIENCE

General Biology 1 Teaching Assistant

Hawai'i Pacific University

September 2024 — December 2024

- Taught two recitation classes each week, led group review sessions, in addition to one-on-one office hours.
- Developed lesson plans and implemented novel studying approaches for students.

CONFERENCES & SYMPOSIUMS

American Fisheries Society Conference

April 2025: Poster Presentation

Hawai'i Pacific University Capstone Symposium

April 2025: Poster Presentation

INBRE Undergraduate Symposium

April 2025: Poster Presentation
